

About AT Intelligence

Your guide to building your genius

We've added a new feature called **AT Intelligence** that you will see throughout your SOAP and Short Notes. This is not AI, but rather, RI, meaning Real Intelligence, as a resource to help you continue to build your genius, and improve patient care.

Randomized tips are specific to the SOAP area in which you are located at the time, and also appear randomly in Short Notes. For example, information about the 'Dial Test' will appear in the Objective section of a Knee SOAP.

The yellow **AT Intelligence** tab has a hover feature and a within-window display, so you won't be taken off the page while completing your documentation. You can simply read the tip and continue on with your SOAP. Some are referenced and others are based on over 30 years of athletic training experience.

AT Intelligence information ranges from tips on injury evaluation, treatment, rehabilitation and even on life balance. We hope you find them helpful.

About Us ATGenius.com was developed for athletic trainers by an athletic trainer to help you document faster, stay organized and show your value.

Record Keeping Made Simple.
