

System Updates November 2024

ATGenius receives many new feature and upgrade requests and we appreciate our member input and feedback to improve and continue evolving our system.

We have created an advisory group to help guide us in prioritizing member requests composed of 10 athletic trainers who use our system, representing different employment settings and areas of the country. Here is a partial list of some of our most recent upgrades:

Schedule an automatic daily send option for concussion symptoms checklists and patient text messages. Please note there is a 10-day maximum.

Preseason Document Dashboard: improved to better track athletes who have turned in physicals and other preseason documents.

Expanded report options for regional managers.

Medical conditions report: a list of athletes who have checked off one or more medical conditions in the portal

Timeline Report: See a complete timeline for a patient, from the initial evaluation through all notes created for the patient.

Document storage: An area to place your standing orders, EAP and other documents for you and your staff.

Expanded Autofill: Create pre-filled text for each section of a SOAP note. This feature works with Open SOAPS and Short Notes. Drop-in text for an entire SOAP note with a single click!

Archive process for older preseason documents, a state law in some areas.

Create list of appointments to email or print: Some ATs need to share this information with school administration.

Thank you for using ATGenius!
Casey and Brandon Christy, Co-owners
